PROFESSIONAL SUMMARY

Entry-level Python Developer and Computer Science Engineering graduate with a BE completed in 2024 from Government Engineering College under Visvesvaraya Technological University (VTU). Currently working as a System Administrator at SPM India Limited since June 2025, with experience in Windows Server administration, Active Directory, IT support, system maintenance, and IT asset management. Completed a 3-month Junior Python Internship at Pelwhiz Technologies Pvt. Ltd. and gained hands-on project experience with Python, Flask, REST APIs, SQL, HTML, and CSS. Developed backend-focused applications including an IT Help Management System, IT Asset Management System, and E-Commerce Website/Backend. Possess working knowledge of Pandas, NumPy, Python DataFrames, Object-Oriented Programming, and basic Data Structures and Algorithms. Seeking an entry-level Python Developer or Backend Developer opportunity to build reliable backend applications and APIs.

TECHNICAL SKILLS

Programming: Python, Basic Data Structures and Algorithms, Object-Oriented Programming fundamentals
Backend Development: Flask, REST APIs, API Development, CRUD Operations, Backend Development.
Databases: MySQL, SQLite, SQL
Frontend: HTML, CSS
Python Libraries & Data: Pandas, NumPy, Python Data Frames, Data Filtering, Data Cleaning, Aggregation, Basic Data Analysis
Development Tools: Git, GitHub, PyCharm, Postman
Systems: Windows Server, Active Directory, System Administration

PROFESSIONAL EXPERIENCE

SYSTEM ADMINISTRATOR

SPM India Limited | June 2025 – Present | Bengaluru, Karnataka

- Perform Windows Server administration, system maintenance, monitoring, and routine IT infrastructure support activities.
- Administer Active Directory activities including user accounts, access-related support, and system administration tasks.
- Provide technical troubleshooting and support for user systems, software, hardware, and IT-related issues.
- Support IT asset tracking, inventory management, system records, compliance documentation, and operational reporting.
- Apply programming knowledge and explore Python scripting/automation where suitable for simplifying repetitive administrative tasks.

PROJECTS

IT HELP MANAGEMENT SYSTEM

Technologies: Python, Flask, REST APIs, MySQL/SQLite, HTML, CSS

- Developed an IT Help Management System using Python, Flask, REST APIs, MySQL/SQLite, HTML, and CSS.
- Implemented ticket creation, assignment, priority, category, status tracking, and CRUD operations.
- Built REST API endpoints with database integration for managing users and support tickets.
- Added search, filtering, dashboard, reporting, debugging, and testing features.

IT ASSET MANAGEMENT SYSTEM

Technologies: Python, Flask, REST APIs, MySQL/SQLite, HTML, CSS

- Developed an IT Asset Management System using Python, Flask, REST APIs, MySQL/SQLite, HTML, and CSS.
- Implemented employee management, asset inventory, allocation, return processing, status tracking, and CRUD operations.
- Built REST API endpoints with database integration for managing assets, employees, and assignments.
- Added search, filtering, dashboard, and basic reporting features based on practical IT asset workflows.

E-COMMERCE WEBSITE / BACKEND

Technologies: Python, Flask, REST APIs, MySQL/SQLite, HTML, CSS

- Developed an e-commerce application using Python, Flask, REST APIs, MySQL/SQLite, HTML, and CSS.
- Implemented user registration/login, product and category management, search, shopping cart, and order processing.
- Built CRUD operations and REST API endpoints with database integration for users, products, carts, and orders.
- Developed backend business logic and performed debugging and functional testing.

INTERNSHIP

JUNIOR PYTHON INTERN

Pelwhiz Technologies Pvt. Ltd.

Duration: 4 Months

- Gained hands-on experience in Python and Flask backend development through small applications and feature development.
- Worked on REST APIs, CRUD operations, routing, request handling, and SQL database integration.
- Integrated Flask backend functionality with HTML/CSS interfaces.
- Performed debugging, testing, and basic issue resolution during development.

EDUCATION

Bachelor of Engineering — Computer Science Engineering

Government Engineering College | Visvesvaraya Technological University (VTU) | 2024
